

Handout 4: Linking Assessment and Monitoring

What should be considered when monitoring the plan?

- Evaluate the effects of interventions, comparing baseline data to data during intervention. Is your plan working?
- If your plan is not working, consider some reasons why it might not be working. What changes are needed in your plan? Make those changes.
- If your plan is working, consider what you will do next. Will you simplify the plan to make it more efficient? Will you fade, change, or terminate your interventions?
- Continue to implement your interventions until you feel they are no longer needed or working.
- After terminating the plan, continue to collect data to determine whether any positive effects are maintained following plan termination.
