# Handout 1: Student Qualification Sheet

**Directions:** This worksheet has been designed to assist school teams in considering whether (a) their school or district has the general procedures in place for identifying students for the data-based individualization process and (b) the student in question has met these basic criteria. Please answer the questions in the spaces provided.

1. What is the process for identifying students who might require data-based individualization?

2. What are the criteria for determining whether a student is non-responsive to Tier 1 supports?

3. Has the student entered a Tier 2 intervention?

4. Briefly describe the Tier 2 intervention.

5. What data are available from the Tier 2 intervention that might indicate the student is non-responsive to those supports?

6. Are there decision rules for determining whether a student requires data-based individualization? If so, what are they?
